Core Services Grows its Family of YMCA customers with Addition of the YMCA of Greater New York **YMCA of Greater New York chooses Core Services as strategic application hosting provider for newly purchased Oracle E-Business Suite Applications**

Morristown, NJ September 5th, 2007 – The YMCA of Greater New York has officially selected Core Services, an Oracle Certified Partner, as their strategic partner for Oracle Application Hosting Services. Building on their success and positive relationship with the YMCA of Metropolitan Los Angeles, Core Services continues to prove to the YMCA organizations that their Oracle Application hosting services are superior to their competitors. The YMCA provides yet another household name to which Core will be held to rigorous standards as their hosting partner.

“The YMCA of Greater New York was looking for a hosting partner that could truly serve as an extension of their organization,” explained Keith Inouye, Vice President of Core Services. “They needed an Oracle Application hosting provider that had the right blend of Oracle expertise, flexibility and customer support to provide them a 3-year platform for success from the initial implementation and on into the future.”

“In today’s economic climate, non-profit businesses are finding it increasingly difficult to contain costs, while continuing to provide the services and products that they deliver to their community,” said John Atwater, Director of Information Technology and Fiscal Analysis of the YMCA of Greater New York. “By hosting our Oracle Applications with Core Services, we will be able to increase our efficiency dramatically by redeploying resources to value-added core business activities.

“Core Services was able to position, and prove that their hosting services were the best choice for our organization. The success they have had with our Los Angeles counterparts helped solidify our level of trust in the Core Services team,” Atwater continued. “Core has taken a strong interest in the YMCA organization, and it is one of many elements driving our ongoing and successful partnership.”

“As a leading human services organization in New York City, the YMCA touches the lives of hundreds of thousands of kids, teens and adults in our nation’s largest city,” added Inouye. “As a service provider, Core’s number one priority is staying customer focused, providing clients with high quality, personalized service.”

With the addition of the YMCA of New York, Core Services continues to grow beyond their West Coast operations and client base, proving that Core’s Oracle E-Business Suite services are in solid demand.

The YMCA of Greater New York is a community service organization which promotes positive values through programs that build spirit, mind and body, welcoming all people, with a focus on youth. Supported in part through contributions to the Strong Kids Campaign, the YMCA provides membership assistance and scholarships to programs like summer camp, child care and teen activities, so that no one is turned away due to an inability to pay.
