Brewer Science and Core Services Celebrate Third Anniversary of Strategic Partnership.

Long-Term Strategic Partnership with Oracle Applications Service Provider, Core Services, Enables Brewer Science to Extend Global Operations.

Morristown, NJ. April 13th, 2006 – Celebrating 25 years in business, Brewer Science continues its rapid global expansion. The U.S. microelectronic materials company recently opened offices in Hong Kong, Taiwan, and Germany, including a new 47,500 square foot research and development facility at their Rolla, Missouri Headquarters.

One of the primary business challenges Brewer Science faced during its growth was that its business processes had become more diverse and complex, nearing sophistication levels of the enterprise level, yet they could not justify the IT staff and financial resources of an enterprise-size company. In 2003, Brewer Science made the important strategic decision to implement Oracle E-Business Suite, collaborating with Core Services for both implementation and hosting services.

Brewer Science needed to bring order to its data, including customer, manufacturing, and financial information. "If you're not prepared to manage the information that arises during rapid growth, that could lead to big trouble," says Joe Bales, Brewer Science's Business Systems Manager. "Once the decision was made to go with Oracle," continues Bales, "we decided that we needed hosting services -- a 24-hour service -- since we are global. We also needed a data center that had redundancy."

"Oracle E-Business Suite made complete sense for Brewer Science's business needs," said Keith Inouye, Vice President of Core Services. "Oracle provided a fully integrated, comprehensive suite of business applications that would tie together the disparate business applications that the company was previously running. Core Services provided a full-service, single-stop shop to address all of Brewer Science's end-to-end Oracle needs and eliminated any potential vendor-to-vendor conflict. This strategic partnership has been extremely successful."

Core Services continues to have a positive impact at Brewer Science. Initially, Core Services had Oracle fully functional with a rapid-fire implementation plan in just a few months. The relationship strengthened over the last three years, as Core Services currently provides both Hosting and ongoing Consulting services for new modules, enhanced features on existing modules, and performance tuning.

“Core Services sets itself apart from its competitors as a truly strategic partner. Its continuous improvements to our Oracle Applications and its superior hosting capabilities have alleviated the strain and distraction that could have consumed our IT department,” says Bales. “By lowering the total cost of ownership of our Oracle applications, improving our performance, and continually providing faster upgrades and technology rollouts, Core Services will continue to be our long-term Oracle hosting and consulting partner.”

About Brewer Science

Brewer Science is a major innovator of high-technology solutions for the semiconductor/microelectronics equipment and chemicals marketplace. The stringent requirements of these markets provide us with opportunities to harness the company's knowledge and creativity to provide the necessary advanced technologies. Our product line encompasses chemicals such as anti-reflective coatings and optoelectronic and MEMS materials, coat and bake equipment for clean rooms, and enhanced planarization tools. We have been working side by side with our customers for 25 years to find the very best solutions that enable them to advance on the cutting edge of micro- and nanoscale devices and more! Explore our different product lines that include the materials, the processes, and the machines to help you achieve your goals. Visit <http://www.brewerscience.com>.

About Core Services Corporation:

Core Services Corporation, an Oracle Certified Partner, delivers Oracle-based business operations solutions and information systems and support to clients worldwide by providing award-winning Oracle Consulting and Oracle Hosting Services. Additionally, Core Services is exclusively authorized to sell and service Oracle Special Edition. Focused exclusively on Oracle Applications since 1990, Core Services also offers Managed, Remote DBA, and Disaster Recovery services in addition to Oracle Consulting Services for new Implementations and Upgrades.
