Oracle® Accelerators Help Spring Hills Implement Oracle Applications in Less than 7 Weeks

Assisted Living Company Goes Live on Time, Under Budget with Core Services

Morristown, NJ. November 15th, 2005 – Faced with rapid growth highlighted by a 33 percent annual industry increase, assisted living community Spring Hills had outgrown its legacy business software system and needed a scalable solution that could handle their needs both for today and for their future. After evaluating competitive offerings, Spring Hills Communities chose the Oracle® E-Business Suite Special Edition over Microsoft Great Plains because the Oracle applications were able to handle the company's incredible growth curve and meet its end-to-end business process needs.

Core Services, a Certified Partner in the Oracle PartnerNetwork, was able to help Spring Hills leverage the Oracle Accelerator tools, and as a result Spring Hills implemented Oracle Applications in less than 7 weeks. "By partnering with Core Services and by utilizing the Oracle Accelerators, Spring Hills was able to rapidly achieve our go-live in record time," said Tom Vellis, CFO of Spring Hills. "We are now positioned to achieve our ROI much faster than originally projected."

An organization that continues to experience growth in a constantly changing business environment, Spring Hills was looking for a system that had the flexibility to adapt to evolving dynamics. And like many other healthcare providers, Spring Hills was specifically looking for a new system that would enable them to run independent sets of books for their different facilities, and still provide the power of consolidated data and overall business insight. They found these important features within Oracle E-Business Suite Special Edition, unmatched by other vendors.

"Oracle applications provided a lower cost entry point and a rapid implementation methodology that matched our business goals," Vellis continued. "With Oracle, we found a powerful system that could quickly meet our needs today and grow with our company."

"The rapid implementation feature of Oracle Accelerators enabled our team to bring Spring Hills live both on time and under budget, in less than seven weeks. Given the scope of work, this could not have been accomplished without the Oracle Accelerators," said Core Services Consulting Vice President Kirsten Haussermann.

Oracle E-Business Suite Special Edition

Oracle E-Business Suite Special Edition North America is delivered with leading business practices that are pre-configured across Oracle Financials, Oracle Inventory, Oracle Discrete Manufacturing, Oracle Order Management, Oracle Purchasing, Oracle Tele-Sales, Oracle Tele-Service, Oracle Field Sales and Oracle Daily Business Intelligence applications. The pre-configuration allows customers to further personalize their solution to meet their business needs and includes an option for Oracle On Demand services.

With Oracle Accelerators for Oracle E-Business Suite Special Edition, Oracle partners can speed the time-to-benefit for customers implementing Oracle applications. Oracle Accelerators are a key advantage of the Oracle applications package and enable both cost and time savings in getting customers up and running with Oracle E-Business Suite Special Edition North America.

About Oracle PartnerNetwork

Oracle PartnerNetwork is a global business network of 15,000 companies who deliver innovative enterprise software solutions based on Oracle software. Through access to Oracle's premier products, education, technical services, marketing and sales support, the Oracle PartnerNetwork program provides partners with the resources they need to be successful in today's global economy. Oracle partners are able to offer customers' leading-edge solutions backed by Oracle's position as the world's largest enterprise software company. Partners who are able to demonstrate superior product knowledge, technical expertise and a commitment to doing business with Oracle qualify for the Oracle Certified Partner levels.
