

Ansell Achieves Oracle Applications Stability and Performance Gains with Move to Core Services

	CLIENT PROFILE Ansell <ul style="list-style-type: none"> • Corporate HQ: Iselin, New Jersey • Industry: Health and Safety • Number of Employees: 14,000 www.ansell.com ASX:ANN	TECHNOLOGY FOOTPRINT <ul style="list-style-type: none"> • Oracle E-Business Suite R12 • Oracle ASCP R12 • Oracle GRC R12 • Oracle SOA Suite 10g • OBIEE 10g • Hyperion Financial Management 11 • Hyperion Financial Data Quality Management 11 • Siebel 8 • EMC XtremIO • Citrix 	CORE SOLUTIONS <ul style="list-style-type: none"> • Oracle ERP Cloud Solutions • Consulting Services

Ansell embarked on a review of its Oracle E-Business Suite Hosting service provider and, after a rigorous 18 month due diligence process, Ansell chose Core Services from a final group of 5 primary providers.

Ansell selected Core for many reasons. First, it liked Core's ability to architect environments streamlined and monitored for high performance, stability, and availability. Second, it liked Core's use of leading-edge, high-performance flash technologies like EMC XtremIO, near-real time, zero data loss, DR capabilities, and its SSAE 16 Type 2 and PCI security and process compliance. Finally, Ansell valued Cores' comprehensive offering, without extra "out-of-scope" charges, all at competitive pricing.

Ansell realized several immediate benefits upon going live. Core's system configuration design dramatically improved performance system-wide.

For example, Core's streamlined architecture allows Ansell to run OBIEE incremental loads in under 2 hours instead of 4+ hours. OTM runs now complete in 12 hours as opposed to 5

“Once we moved our applications to Core Services, our system response and processing times improved dramatically with programs running two to three times as fast as they did before, and reducing processing time for large jobs by over 60%, a truly remarkable performance. Core Services offers a comprehensive solution coupling leading edge technology with the technical expertise and process discipline that make it all work as it should.”

Giri Peddinti ■ Ansell Senior Vice President and Global Chief Information Officer

days. Ansell's sales staff can place orders in Siebel faster and EBS users now enjoy the previously rare experience of forms opening "immediately." Ansell anticipates further productivity gains once Core completes tuning Ansell's PL/SQL code based on insights from Core's proprietary monitoring systems and its highly qualified technical team.

ACCOMPLISHMENTS

- Stabilized its Oracle environment
- Improved performance of key applications
- Reduced Oracle Trade Management run times by 90%
- Ensured business continuity with robust disaster recovery

It's easy to get started.
